

3D Architectural Model Printing Solution

LGM Capital Presents the Ultimate in 3D Architectural Model Making

LGM has been a one of the nation's leading architectural model shops for over 15 years, providing a huge variety of scaled architectural models. Our full service 3D model shop provides unique and state of the art tools, CAD technology, and an integrated product line to clients world wide.

Now LGM Capital presents the ultimate model printing solution for architectural firms. LGM Capital's CADspan lets you take a **WHAT YOU SEE IS WHAT YOU GET** approach to concept modeling, letting you worry about your design and not about whether or not your model will be printable. Following this simplified approach to data creation and preparation, are the premier tools for architectural model printing, ZCorporations' 3D Printer and the xlaFORM resin based infusion system. These pieces of hardware insure the fastest and most cost effective 3D printing solution available. Best of all this innovative technology takes only hours to produce stunning models not weeks. LGM Capital is all about providing the very same technology that is used by the LGM model shop to every architectural firm ready to move from 2D sketches, renderings and hand made models to a real 3D printing solution.
